

TRAILER TENT/ FOLDING CAMPER MEASUREMENT GUIDE

This diagram shows a trailer unit with two sloping end, with no elbow, this style is often found with Pennine Pullman covers.

A = Length of slope at rear

B = Length along base of trailer body

C = Length of slope at front

D = Length along top of trailer body

E = Side depth of cover required

Please also state the total width of the trailer body and specific hook spacing if required

The above diagram shows the side view of a trailer tent with two sloping ends. Please check the measurements from A - D
On your own trailer.
